

Infrastructure is broken. We reinvent it!

EVA offers a full range of connected terminals to facilitate safe and automated drone operations

MARKET SEGMENTATION
AND EVA OFFER

Add-On Products:

- SmartCx (Container for drones and stations)
- SmartOn (Remote Arming System for Drones)

What an EVA port Offers

EVA stations are deployed to create a drone corridor to connect 2 cities and provide services for healthcare, logistics, agriculture, security,...

1

HEALTHCARE

A single point of operation for recharging drones, transporting medical kits and refrigerating drugs and vaccines. No drone training required for health care workers

2

E-COMMERCE

Smart stations connected with restaurants can now store parcels from e-commerce companies. Food delivered on roof-top with vertipad.

3

AGRICULTURE

Agri stations can offer area weather info, agri analytics and spray drone maintenance at a single point.

4

SECURITY FORCES

ports can automate speedy supply to the front line units during tense scenarios. Anti-drone stations, part of a meshed network can shoot down rogue drones
