

Infrastructure is broken. We reinvent it!

EVA offers a full range of conected terminals to facilitate safe and automated drone operations

What an EVA port Offers

EVA stations are deployed to create a drone corridor to connect 2 cities and provide services for healthcare, logistics, AGRICULTURE agriculture, security,...

HEALTHCARE

A single point of operation for recharging drones, transporting medical kits and refidgerating drugs and vaccines. No dronetraining required for health care

Agri stations can offer area weather info, agri analytics and spray drone maintenance at a single point.

E-COMMERCE

restaurantscan now store parcels from ecommerce companies. Food deliverd on roof-top with vertipad.

SECURITY FORCES

ports can automate speedy supply to the front line units during tense scenarios. Antidrone stations, part of a meshed network can shoot down rogue drones
